Disposable nappy-pants for baby or incontinent adult - has elasticated rear waistband with central fixing to give leakproof waist seal		
C86-147612 E(AT BE CH DE GB IT LI NL)		
<p>The nappy is of the type that has an absorbent pad sandwiched between an inner, permeable, unwoven sheet and an outer, waterproof sheet to which the pad is fixed.</p> <p>The nappy is shaped with elasticated cut-outs for the legs and with an elasticated waistband fixed along the rear of the nappy so that the ends of the waistband can be attached to the front of the nappy.</p> <p>The elasticated waistband comprises a narrow elastic strip that extends along the outer sheet slightly set in from the edge of the sheet. The elastic strip is fixed to the outer sheet only at a narrow, central zone of the sheet.</p> <p>The elastic strip is sandwiched between the inner face of the outer waterproof sheet and a wider gusset band fixed to the outer sheet on both sides of the elastic strip.</p> <p>The extreme opposite ends only of the elastic strip are provided with attachments to fix to the front of the nappy.</p>		
<p>LENGTH OF ELASTIC STRIP In its unextended state, the length of the elastic strip, taken over the end attachments, is slightly more than the length of the tunnel formed by the gusset band.</p> <p>The attachments project slightly into side cut-outs of the back section of the nappy.</p> <p>USE Disposable nappy-pants for a baby or incontinent adult.</p> <p>ADVANTAGES The waistband size is easily adjustable by varied tension on the elastic strip. A snug fit around the wearer's waist provides a leakproof seal without discomfort. Mfg. materials requirement is reduced for cheaper prod.</p> <p>An absorbent pad (6) is sandwiched between a soft, permeable inner sheet (9) and a waterproof outer sheet (1).</p> <p>The leg cutouts (4) are elasticated.</p> <p>The rear panel (2) has an elastic strip (12) secured to the inside of the outer sheet at a central zone (12a) only. A gusset band (5) is fixed to the outer sheet over the elastic strip. (26pp448PADwgN01/8).</p> <p>(F)ISR: FR2289131 FR2087346 FR2534781 EP-206208-A+</p>
